Construction	I am concerned about my property	There is a culvert replacement/realignment in front of your property. I have attached a snip of the hearing plan to show you the proposed work. Can you tell me specifically what your concerns are?
Construction	If I will lose a good amount of it.	The proposed right of way acquisition is around 1600 square feet, or about 0.04 acre (this is a rough estimate - the exact amount will be determined in the final mapping phase happening now). The culvert in front of your property is being replaced with a larger box culvert and realigned to the stream. The drainage run from your driveway culvert to the stream is being rip rapped to deter erosion, there will be a drainage easement around the area so we can maintain it. The trees in the immediate area will need to be cleared in order to do this work. All of these rights will be explained in greater detail when our appraiser contacts you - currently scheduled for fall of 2021
None provided.	Was wondering if there ever going to rebuild 1 A between Harrington and Milbridge	<i>No response requested.</i>
Other, Construction	Hello, my questions are. 1. Will the utility poles be replaced in the construction project? 2. Has a contractor been determined to do the project?	Yes utility poles are being replaced. No contractor will be selected until the project is advertised and bids received.
Other, Construction, Road/Design	We question the need to reroute our water main to accommodate a larger culvert. Very expensive for a small water district. We don't have the money.	We have forwarded your concerns to our utility coordinator Derrick Carleton and he will be reaching out to you
Other, Right of Way, Road/Design	How can I receive an enlarged view of the 1st link of the project design	Is there a specific location you are looking for?
Right of Way	Where do I find out if my property will be impacted by this project?	Is this your property in the attached document? In front of that property we are removing the guardrail and upgrading the drainage. No major impacts to the property All work is within the existing right of way except for a little clearing at the south end of your property.
Right of Way	Hi, thx for getting back to me. No that isn't my property.	Sorry for the confusion. Is the attached document your property? In front of this property is basically upgrading the drainage.
